

JECRC College	2021 – 2025
B.Tech in Artificial Intelligence and Data Science (CGPA: 7.92/10)	Jaipur, Rajasthan
Senior Secondary (XII) Vidhyanjali Academy, Kota (CBSE)	83.80% 2021
Secondary (X) Lawrence and Mayo, Kota (CBSE)	86.80% 2019

EXPERIENCE

Capgemini	Aug 2025 – Present
GenAI Engineer	Hybrid
- Architected enterprise-grade RAG pipelines using Azure OpenAI & LangChain, improving domain-specific answer accuracy by ~40% over baseline models. - Designed multi-agent LLM workflows to automate 3+ internal business processes, reducing manual processing time and improving operational throughput. - Integrated GenAI into existing systems via Azure AI Foundry & Azure Functions, enabling AI adoption without rearchitecting legacy infrastructure.	
Dbugger Cloud Solutions	Sept 2023 – April 2024
Cloud Intern	Onsite
- Managed and optimized AWS infrastructure (S3, EC2, Lambda, RDS); improved deployment efficiency by 20% using Elastic Beanstalk CI/CD pipelines. - Containerized 5+ legacy applications with Docker and orchestrated zero-downtime deployments using Kubernetes, eliminating environment inconsistency issues across dev and prod.	

PROJECTS

Autonomous Multi-Agent Testing SaaS	Feb 2026
Python, AutoGen, Azure AI Foundry, React, PostgreSQL	
- Built a Multi-Agent System using AutoGen that auto-generates test suites from natural language requirements, reducing manual test-writing effort by an estimated 70%. - Deployed on Azure AI Foundry with Azure OpenAI Chat Models for low-latency inference across parallel test generation agents. - Engineered a PostgreSQL backend to persist test history and requirement versions, enabling full audit trails and regression tracking for QA teams.	
AI Lead Gen & Outreach Engine	Jan 2026
n8n, AWS, Docker, Nginx, Google Maps API, WhatsApp/Gmail API	
- Engineered an autonomous n8n outreach engine on AWS (Docker + Nginx) extracting 100+ targeted business leads/day via Google Maps API with zero manual input. - Automated full outreach cycles via WhatsApp & Gmail APIs, cutting outreach time from hours to minutes and eliminating all manual follow-up.	
Intelligent OCR Finance Agent	Dec 2025
n8n, Docker, Nginx, Python, Telegram, Vision LLM, Supabase	
- Designed a Telegram-based AI finance agent (Docker + Nginx) supporting chat commands and receipt photo uploads for fully automated expense tracking. - Implemented a Vision LLM OCR pipeline achieving 90%+ accuracy on itemized costs, tax categories, and merchant details from complex receipts. - Integrated Supabase for persistent expense storage with automated monthly budget summaries and category-wise breakdowns delivered via chat.	

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900) Microsoft	2024
---	------

TECHNICAL SKILLS

AI & Automation: n8n, AutoGen, LangChain, Multi-Agent Systems, RAG, OpenAI API, Azure AI Foundry

Cloud & DevOps: AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Nginx, Git, CI/CD, Terraform

Programming: Python, C#, .NET, SQL, Shell Scripting, Java, C++

Databases & Frameworks: PostgreSQL, Supabase, ReactJS, Boto3, Flask, FastAPI
